

FISH TERMINOLOGIES

FISH Climate Hazards Vocabulary

Report Format:	Hierarchical listing
Description:	This vocabulary of climate change hazards, the potential negative climate events that may cause damage or loss, builds on the Climatic Impact-Drivers defined by the Intergovernmental Panel on Climate Change creating a list of climate hazards for heritage.
Date:	May 2024
Linked Data:	http://purl.org/heritagedata/schemes/38076

FISH Climate Hazards Vocabulary: Hierarchical

Coastal

- Coastal erosion (CID type)
 - Coastal erosion
 - Coastal landslide
- Coastal flood
 - Coastal flooding
 - Saltwater incursion
- Relative sea level
 - Saltwater incursion
 - Sea level rise
- Storm surge

Heat and Cold

- Cold spell
 - Low temperature events
 - Cold wave
- Extreme heat
 - High temperature events
 - Heat wave
- Rapid humidity fluctuations
- Frost
 - Freeze-thaw cycles
 - Freeze-thaw events
 - Frost heave
- Mean air temperature
 - Average humidity patterns
 - Average temperature patterns
 - Biological growth
 - Salt crystallization cycles
 - Species distribution

Open Ocean

- Dissolved Oxygen (CID type)
 - Biological growth
 - Dissolved Oxygen
 - Low oxygen events
 - Species distribution
- Marine heatwaves (CID type)
 - Biological growth
 - Marine heatwaves
 - Species distribution
- Mean ocean temperatures
 - Biological growth
 - Ocean currents
 - Species distribution
 - Water temperature
 - Wave action
- Ocean acidity
 - Acidification
 - Biological growth
- Ocean salinity (CID type)
 - Biological growth
 - Ocean salinity
 - Species distribution

Other

- Air pollution weather (CID type)
 - Air pollution weather
- Atmospheric CO2 at surface
 - Biological growth
- Radiation at surface
 - Biological growth

Snow and Ice

- Hail (CID type)
 - Hail
- Heavy snowfall and ice storm
 - Fluvial flood
 - Freezing rain
 - Heavy snowfall
 - Ice storm
 - Pluvial flood
 - Rain-on-snow
- Lake, river and sea ice
 - Biological growth
 - Ice extent
 - Shoreline erosion
- Permafrost
 - Frost heave
 - Permafrost thaw
- Snow, glacier and ice sheet
 - Acidification
 - Coastal erosion
 - Extreme melt event
 - Fluvial flood
 - Glacial melt
 - Groundwater flooding
 - Sea level rise
 - Shoreline erosion
 - Water table
 - Water temperature
- Snow avalanche
 - Avalanche

Wet and Dry

- Agricultural and ecological drought
 - Biological growth
 - Drought
- Aridity
 - Average humidity patterns
 - Desertification
 - Desiccation
 - Water table
- Fire weather (CID type)
 - Fire weather
 - Uncontrolled fire
- Heavy precipitation and pluvial flood
 - Heavy precipitation event
 - Pluvial flood

FISH Climate Hazards Vocabulary: Hierarchical

Wet and Dry (continued)

- Hydrological drought
 - Drought
 - Water table
- Landslide (CID type)
 - Landslide
 - Mudslide
 - Rockfall
 - Shrink-swell
 - Soil heave
 - Subsidence
- Mean precipitation
 - Average humidity patterns
 - Average precipitation patterns
 - Groundwater flooding
 - Salt crystallization cycles
 - Water table
- River flood
 - Fluvial flood

Wind

- Mean wind speed
 - Average humidity patterns
 - Average wind speed
 - Average wind transportation patterns
 - Wind-driven rain
- Sand and dust storm
 - Dust storm
 - Sand storm
- Severe wind storm
 - Coastal flooding
 - Derecho
 - Extratropical cyclone
 - Extreme wind speed
 - Hail
 - Heavy precipitation event
 - Storm surge
 - Thunderstorm
 - Tornado
 - Wave action
- Tropical cyclone (CID type)
 - Tropical cyclone
